Chemeca

Chemical engineering megatrends and the elements
International Year of the Periodic Table

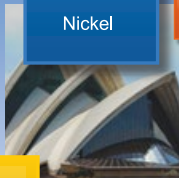

Si

Silicon

Li

Lithium

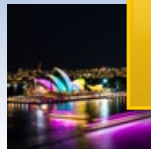

Ni

Nickel

Na

Sodium

C
Carbon

Save the date for Chemeca 2019

29 September – 2 October 2019, Sydney

100 years IUPAC & Engineers Australia

The 48th Chemeca will be held in Sydney NSW, Australia from 29 September – 2 October. Located on Australia's east coast, the metropolis surrounds Port Jackson and sprawls about 70 kilometers on its periphery towards the picturesque Blue Mountains. Sydney is renowned for the Sydney Harbour Bridge and the Sydney Opera House.

Chemeca brings together chemical engineers from Australia, New Zealand and other countries who will gather to share their insights and innovations relevant to chemical engineers across the wide range of industries we work in.

The committee encourages papers that explore the emerging opportunities and challenges for the chemical engineering profession and process industries throughout our region. Our plenary, keynote and other invited speakers have been specially selected to challenge our thinking and bring a global perspective to this discussion.

Whether you would like to contribute to the conference programme, be a major sponsor for the event or attend to network with like-minded professionals, we look forward to welcoming you to picturesque city of Sydney for Chemeca 2019.
